

@ Cognizone you'll get involved with state-of-the-art technologies and innovative projects, but that's not all!

You'll be part of a fast-growing company.

You'll feel inspired by your colleagues who are fully dedicated to their jobs.

You'll work in a multi-national environment with colleagues from all over Europe.

## Frontend Web Developer

We are looking for a Frontend Web Developer who wishes to combine the arts of front-end implementation with back-end Java development. The front-end developer will build tools and applications that will leverage technologies across HTML, CSS, Angular JS, Java and Spring. You will be working with our other team members but also in close contact with our customers, both in the private and public sectors.

### Specific responsibilities:

- ✓ Create scalable, fault tolerant, resilient web applications
- ✓ Ensure that all developed applications are extensively tested and sufficiently documented
- ✓ Work closely with our team members but also without our customers to elaborate and define requirements, priorities and estimate timelines
- ✓ Quickly develop executable prototypes and iterate on ideas
- ✓ Tenaciously follow technology advancements relevant to our customers and propose integration and use

### We would like you to have the following:

- ✓ Excellent spoken and written command of the English language
- ✓ Good spoken and written command of the French or Dutch language
- ✓ Fluent in HTML, CSS, DOM and JavaScript libraries (such as Bootstrap)
- ✓ Experience with JavaScript MVC frameworks such as AngularJS, Vue.js or React.js
- ✓ Be familiar with HTTP, REST technologies and JSON

### It would make us smile if:

- ✓ Familiar with Agile methodologies and principles
- ✓ Knowledge of server-side view technologies (JSP or Thymeleaf preferably)
- ✓ Experience with RDBMS concepts and SQL
- ✓ Experience working with Git/GitHub
- ✓ Familiar with Java

### What we offer:

- ✓ Get involved with state-of-the-art technologies and innovative projects.
- ✓ Be part of a fast-growing company.
- ✓ A competitive salary including benefits.
- ✓ Team building events under a shining sun.

### Company description:

Cognizone is a start-up of several ICT engineers, experienced in different computer science disciplines, working with data and semantics for the last 15 years, providing industrial strength solutions.
